All

All

- **Farming System:** Permanent crops Apple, vineyards

- **Farm vulnerability component:** Management practices

- **Description:**

Installing nets and foil roofs against hail, frost, heavy precipitation and radiation

- **Comments on sustainability:**

The protection devices need some investments but the benefit, especially against hail, is very high. A further side effect is the protection from bird and west feeding. The product quality can be improved considerably.

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
