

- **Climate Risk Region:**
- **Weather event addressed:**

Continental

Fall

- **Farming System:** Permanent crops      Apple, vineyards
- **Farm vulnerability component:** Varieties
- **Description:**

Cultivation of late ripening vine varieties (e.g. Cabernet Sauvignon, Cabernet Franc) or apple varieties (e.g. Topaz, Florina und Solaris)

- **Comments on sustainability:**

Due to the longer vegetation period till October/November, late ripening varieties can be cultivated, e.g. new red wine varieties from southern regions. This creates market opportunities for new varieties from the region.

## Implementation · MID TERM

### SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
