

- **Climate Risk Region:**
- **Weather event addressed:**

Continental

Spring

Summer

- **Farming System:** Livestock
- **Farm vulnerability component:** Animal welfare
- **Description:**

Sufficient and easily accessible drinking troughs in the barn and on the pasture

- **Comments on sustainability:**

During heat periods, animals have a higher need for water. This has to be satisfied by easily accessible and sufficient drinking troughs. In this case, drinking bowls are advantageous. The investment will be rewarded by a more stable production and a good health of the animals.

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
