All

- **Farming System:** Livestock Dairy cows

- **Farm vulnerability component:** Soil and farming practices

- **Description:**

To cope with climate change, diverse external agricultural information services are used

- **Comments on sustainability:**

The advice for sustainable adaptation measures ideally has positive synergy effects (e.g. lower GHG emissions, improved soil infiltration, stabilised yields). At the same time, the farmer has to have a good understanding of his own production system and observe it well. External advice is necessary.

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
