

- **Climate Risk Region:**
- **Weather event addressed:**

Continental

Summer

- **Farming System:** Permanent crops Apple
- **Farm vulnerability component:** Management practices
- **Description:**

A reduced pruning on the sunny side of the trees protects the trees from sunburn during high temperatures

- **Comments on sustainability:**

A reduced pruning means more organic material and a higher degree of shadow, which has a positive effect on the soil /soil organisms. Less pruning means less workload and simultaneously higher (quality-) yields

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
