

- **Climate Risk Region:**
- **Weather event addressed:**

Continental

Winter

Spring

- **Farming System:** Permanent crops Apple and vineyards
- **Farm vulnerability component:** Management practices
- **Description:**

Removal of obstacles which avoid the flowing out of the cold air and implementing of plantings on the hilly side

- **Comments on sustainability:**

The measure means additional workload but it helps to secure the yields and to avoid heavy frost damages. It is recommendable to consult technical experts.
