

- **Climate Risk Region:**
- **Weather event addressed:**

Continental

Summer

- **Farming System:** Permanent crops      Apple and vineyards
- **Farm vulnerability component:** Management practices
- **Description:**

To ensure nutrient uptake during drought periods, a leaf fertilization should take place

- **Comments on sustainability:**

The possibility of supporting plants with nutrients by leaf fertilization, even during drought periods, has positive consequences on the yields and the quality of the fruits.

## Implementation · SHORT TERM

### SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
