

- **Climate Risk Region:**
- **Weather event addressed:**

Continental

All

- **Farming System:** Permanent crops      Apple and vineyards
- **Farm vulnerability component:** Management practices
- **Description:**

Increasing the strength of the plantation e.g. using tensioning ropes, concrete poles and - anchors

- **Comments on sustainability:**

The implementation of the measure needs some investment and a higher workload in the beginning. It is especially worth in exposed regions with a higher storm risk to avoid yield losses.

## Implementation · SHORT TERM

### SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
