

- **Climate Risk Region:**
- **Weather event addressed:**

Continental

All

- **Farming System:** Livestock Dairy cows, pigs
- **Farm vulnerability component:** Herd management
- **Description:**

Optimized hygiene in the barn, the pasture and in the feeding and drinking area reduces the extension of (new) pathogens

• **Comments on sustainability:**

Due to higher temperatures (new) warmth loving pathogens such as salmonellae, *E.coli* and parasites on the pasture are spreading faster. An optimized hygiene supports healthy and productive animals. This reduces the need for the veterinarian and for medicine.
