

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

- **Farming System:** Arable crops All arable crops
- **Farm vulnerability component:** Soil & farming practices
- **Description:**

To apply Integrated Pest Management (IPM) practices

- **Comments on sustainability:**

It can reduce (or make more effective) the treatments and other tasks on farm, and then reduce GHG. It can avoid unnecessary treatments or at least a more efficient use of agrochemicals that favor biodiversity. It can reduce costs of treatments and farming inputs. It can entail less workload (or more efficiency). Technical assessment necessary

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
