

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

- **Farming System:** Arable crops All arable crops
- **Farm vulnerability component:** Soil & farming practices
- **Description:**

To avoid bare soil sowing fallow lands in autumn, especially in high slope soils

- **Comments on sustainability:**

Sown fallow lands avoid erosion in bare soils by intense rainfall and floods. Then it's a positive measure for soils, biodiversity and GHG emissions, since it allows to keep organic carbon into the soils.

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
