

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Autumn

Winter

- **Farming System:** Permanent crops Vineyards
- **Farm vulnerability component:** Soil Management
- **Description:**

Living structures, key line design, terracing... it includes any technique for avoiding the loss of organic matter

- **Comments on sustainability:**

The first layers of agricultural soils are rich in organic matter, nutrients and living organisms. Erosion means losing all this. Different techniques, from simple to complex can be implemented

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
