

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Summer

Summer

- **Farming System:** Permanent crops      Vineyards
- **Farm vulnerability component:**      Crop management
- **Description:**

Bunch clearing for balancing the vine stress and the productive capacity

- **Comments on sustainability:**

Bunch clearing means balancing fruit production with the plant physiological potential according to the year meteorological conditions. It is very important to maximize quality ad long term vine health

## Implementation · SHORT TERM

### SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
