

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Summer

Summer

- **Farming System:** Permanent crops Vineyards
- **Farm vulnerability component:** Crop management
- **Description:**

Pruning as late as possible for delaying the crop cycle, and avoiding ripening under stressing conditions

- **Comments on sustainability:**

Late pruning promotes a delayed bud breaking and also a delayed crop cycle. The objective is to postpone grape ripening for avoiding critical periods

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
