

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Spring

Summer

- **Farming System:** Permanent crops Vineyards
- **Farm vulnerability component:** Crop management
- **Description:**

Hails for protecting bunches. They are installed from grape formation to harvest

- **Comments on sustainability:**

Nets installed above the vine canopy or laterally covering bunches suppose a high investment but that can be worth in areas with high hail frequency

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
