

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Summer

Summer

- **Farming System:** Permanent crops Vineyards
- **Farm vulnerability component:** Water management
- **Description:**

Use of the most efficient system (drip irrigation). Delivers right amount, in the right place, at the right time

- **Comments on sustainability:**

Water may be a scarce resource in the future, especially in areas where vineyards occur. Using wisely water is also beneficial for a good plant health
