

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Summer

Summer

- **Farming System:** Permanent crops      Vineyards
- **Farm vulnerability component:**      Water management
- **Description:**

Cutting irrigation during grape ripening for concentrating sugar and phenolic compounds

- **Comments on sustainability:**

Water stress during fruit ripening can help to improve grape organoleptic quality in some farms focused on quality wines, although effects can change from farm to farm

## Implementation · SHORT TERM

### SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
