

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Summer

Summer

- **Farming System:** Permanent crops Vineyards
- **Farm vulnerability component:** Genetic variability
- **Description:**

Use of local varieties that are adapted to local conditions

- **Comments on sustainability:**

Native varieties are better adapted to local soil, climate and pests. They usually need less agricultural inputs (water, fertilizers, treatments) and are more stable in the yields.

Implementation · LONG TERM

SUSTAINABILITY COMPONENTS
