

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Summer

Summer

- **Farming System:** Permanent crops Vineyards
- **Farm vulnerability component:** Genetic variability
- **Description:**

Understand the different peculiarities within a variety and its potential in terms of adaptation

- **Comments on sustainability:**

Some native varieties still hold an unknown genetic variability that can entail a better adaptation to different soils, resistance to pests, etc. Research is needed for characterizing some of the native varieties

Implementation · LONG TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
