

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Summer

Summer

- **Farming System:** Permanent crops      Vineyards
- **Farm vulnerability component:** Genetic variability
- **Description:**

Understand how varieties and rootstocks' combinations can result in more adaptive plants

- **Comments on sustainability:**

Apart from genetic variability within varieties, the combination with different rootstocks multiplies the possibilities of obtaining plants with different adaptation possibilities

## Implementation · LONG TERM

### SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
