

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

- **Farming System:** Permanent crops

Vineyards

- **Farm vulnerability component:**

Processing

- **Description:**

Mix different wines obtained for optimizing wine profile and/or reducing defects

- **Comments on sustainability:**

Wine courage (mixing different wines) is a common technique in wineries for balancing wines, and that can help to reduce the impact of low quality grapes affected by adverse meteorological conditions

Implementation · SHORT TERM

SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
