

- **Climate Risk Region:**
- **Weather event addressed:**

Southern

Spring

Summer

- **Farming System:** Livestock

- **Farm vulnerability component:**

Dairy

Animal buildings

- **Description:**

Reduce animal density for increasing animal comfort during heat waves

- **Comments on sustainability:**

When animal density in buildings is reduced, the thermal comfort increases. This can be only achieved when there are enough places for reducing density and therefore may be limited in some cases.

## Implementation · SHORT TERM

### SUSTAINABILITY COMPONENTS

- GHG emissions
- Air quality
- Soil
- Water
- Biodiversity
- Animal Welfare
- Economic
- Social
- Technical Feasibility
